

*Deliver Improved Outcomes in Workplace Health and Safety with a Single Cloud-Based Modern Digital Acceleration Platform.*

*Care for your Workforce with Compliance to Regulations.*

*Finally, a Digital Cloud Platform for managing workplace health & safety across multiple sites of a single org, without operating multiple systems and resource intensive, error prone manual data entry, that makes your care program sluggish in delivery.*

## **Emidence-XD: Next Gen Workplace Health Safety Quality Management System**

### **Health & Safety Culture for Health Systems**

Progressive organizations strive to provision a safe and healthy work environment aiding in enhanced productivity for employees, contractors with focus on training, prevention and safety advocacy. This sets the tone for a safety culture in the organization. Recent statistics on Occupational Safety and Health by the Bureau of Labor Statistics indicate reduction of total recordable cases (TRC) incidence rate (2.9 per 100 FTE) among private industry employers.

According to the BLS Nov 2017 'Survey of Occupational Injuries & Illnesses' report, approximately 1 in 5 injury and illness cases reported by private industry employers in 2016 occurred in healthcare and social assistance industries. About half of all non-fatal injury and illness cases reported among private industry establishments in 2016 occurred in just three industry sectors—health care and social assistance, manufacturing, and retail trade.

The manufacturing and health care and social assistance industry sectors together reported more than half (52.7 percent) of all private industry illness cases in 2016. The manufacturing and health care and social assistance industry sectors together reported more than half (52.7 percent) of all private industry illness cases in 2016.

### **The Emidence-XD Difference**

Emidence-XD is built on the Xybion "Digital Acceleration Platform," a new low-code technology stack that powers faster innovation, increased operational efficiency, and reduced cost.

Emidence-XD was designed for 'Occupational Health and Occupational Medicine' industries where high levels of regulations and strict evidence-based documentation of activities are necessary for both compliance and/or for safety and liability management.

The platform helps global organizations effectively automate, manage and control workplace health and safety workflows which are rapidly deployable and easily configurable leading to go-live in weeks rather than several months, leading to faster ROI.

## Key Functionalities

### OSHA Compliance

- Program Management & Compliance
- OSHA Standard Reporting
- Data Analytics & Drill Down Dashboards
- Predictive Compliance

### Incident Management

- Incident Reporting
- CAPA Workflows

### Return to Work

- Program and Policy Management
- Assessment of Fitness for Resumption of Duty
- Employee Services

### Workers' Compensation Cloud

- Case Management
- Claims Process
- Billing and Bill Review

### Industrial Hygiene

- Exposure Assessment

### Credential Management

- Auto-Update of Credentialing Data
- CME Management

## Optimize Care and Productivity with Embedded Compliance

### Workers' Compensation Management

Evidence-XD enables a Workers' Comp Cloud™ for evidence-based claim processing system.

This is a purpose-built cloud with ACOEM/MTUS evidence & outcome-based analytics and reports. The WC cloud leads to reduced cycle time and cost of claim processing. WC provides built-in evidence that the treatment plan recommended for the patient has been done and the outcomes are documented. This ensures reduced claim denials.

WC Cloud supports real time tracking, monitoring and reporting of outcomes with evidence based real time risk projection & management. The advantage is unlimited reporting with extensive configuration.

WC cloud is a configurable product with granular security, flexibility between various State and Federal Healthcare Regulations, HIPPA, HL7, and 21CFR part 11.

### Industrial Hygiene Management

Evidence-XD provides for management of mitigation of health and safety hazards from a range of chemical, physical, biological and ergonomic stressors.

Employers can perform and manage assessments for Noise Exposure, Indoor Air Quality, Indoor Molds, Chemical Exposure and other Occupational Hazards.

Multiple Site-specific reports can be aggregated for a single organization within the same system, reducing information overload and centralized data availability.

### Credentialing

Certifications, continuing medical education credits (CME), training records and credentials of caregivers can be managed through automated data imports from state web sources, through the Evidence-XD system. Historical records can be maintained and reported as required.

### Safety Training Management

Evidence-XD empowers organizations to provide safety training through online, instructor-led virtual courses, where an individual or a group can access desired topics through secure user access control, thus allowing stakeholders to learn at their own pace, with track and reporting.

WC Cloud allows the users to create and schedule organization-specific training and assessments, such as for construction & general safety, laboratory safety and compliance. The assessments can be as for a new employee or post-injury fit for resumption of work scenarios. Employees working in multiple sites, can be managed in a single org environment.

### Standard OSHA / BLS reporting:

- OSHA 300, 300A & 301 Reporting
- TRC total recordable cases
- DART days away from work, job transfer, or restriction cases
- DAFW days away from work cases
- DJTR days of job transfer or restriction only cases
- ORC other recordable cases
- Near Misses
- Custom Reporting

## XYBION'S DIGITAL ACCELERATION PLATFORM: SIMPLIFY & UNIFY

### Future-Proof Your Technology Investments with a Clear Path on ROI

Evidence-XD offers multiple apps for processing and review of billing, health & safety, OSHA reporting, case management, EMR/EHR for workplace injury management, and medical care.

Evidence-XD provides a single, out-of-the box, yet highly configurable solution to holistically manage workplace health & safety. It delivers immediate value without expensive customization, minimizing total cost of ownership and ROI.

*Evidence-XD is a low-code technology stack that leverages the core principles of Unified Operational Ecosystem, Rapid Configuration Engine & Intelligent Digital Workplace for true Digital Acceleration, not just Transformation.*

### Xybion - Your Expert Partner

Leveraging our extensive global experience working with companies of all sizes, we offer deep domain knowledge of FDA regulations and have a long track record of helping clients build effective compliance and risk mitigation strategies and solutions.

Since 1977 Xybion has provided software, services and consulting for global corporations operating in highly regulated industries. Our unique solutions focus on regulatory compliance, GRC, quality management, GxP, integrated preclinical lab man-

agement, early-stage drug discovery, content migration, systems validation and health & safety. Xybion specializes in helping companies improve their overall compliance processes and provides a complete view into organizational risk across global organizational models.
