

*Reduce claim expenses and increase efficiencies through Xybion’s Suite of Managed Care Applications.*

## Case Management

### Your Process. Your Way.

Imagine a configurable, simple to use case management platform that enables you to follow an injured employee through the life cycle of their claim. With the Evidenced™ Case Management platform, you get just that. Xybion’s Case Management platform starts with the first report of injury and easily integrates with all stakeholders along the employee care path. Our system is designed to capture BIO-Psycho-Social factors and has a full risk assessment built in, enabling real-time decisions.

### Benefits of Xybion’s Case Management Platform

- 100% cloud-based & accessible via any device
- Integrated database with real-time access to coordinate care
- Easily integrates with third party vendors
- No software to download
- Completely configurable—updates take days, not months
- Automated rules engine for case assignment and routing
- Reduce medical costs via evidence-based care path
- Real-time capability for prior authorizations requests
- Electronic case notes
- Provider assignment
- Configurable to support medical services, vocational services, specialized services and return-to-work objectives

### Next Generation Solutions for Health & Safety
