# A Complete Quality, Risk & Compliance Solution

## ENTERPRISE-CLASS TECHNOLOGY

Xybion's Labwise® XD Quality Management Solution combines leading edge technology, advanced workflow and analytics that will help your organization ensure consistency and compliance across a broad spectrum of key business processes such as Quality, Governance and Risk, and Collaboration Management. Unlike point solutions that may focus on one specific quality management function, Labwise® XD Quality Management Solution facilitates the integration and management of disparate, but related mission critical functions across the enterprise mitigating risk, increasing productivity and lowering the total cost of ownership. Xybion offers technology to connect the Quality Management system with other key enterprise activities, such as Asset Management, Research and Development and Document Management.

## SERVICES AND BUSINESS CONSULTING

To support global departments, Xybion's suite of enterprise technology is backed by an experienced professional team with the knowledge and expertise to ensure the Labwise® XD Quality Management Solution meets the organization's requirements.

Xybion can deliver the following services to complement your quality management initiatives:

- Industry staffing services to support technology/processes
- Governance, risk and compliance consulting
- Information and document management consulting
- Integration and migration services
- Technology implementation
- Systems and process validation
- Project Management
- Strategy consulting

## Validation-Ready Services & Documentation

- Labwise® XD Quality Management Audit is designed exclusively for deployment in highly regulated software environments.
- Because intended use varies from one company to another, we deliver a practical validation toolkit which includes a complete set of pre-written validation protocols including IQ, OQ, and PQ Operational test scripts to ensure production readiness and accelerate validation.
- The validation methodology follows the latest GAMP guidance and principles of software validation.
- Our experienced professional services team can help you streamline your validation effort and reduce time-to-compliance and ongoing operational support.
