

CQRM XD Credana is a leading digital workplace solution providing end-to-end process management to automate and simplify the complex process of accreditation, recognition and auditing programs, including the Medical Device Single Audit Program.

CQRM XD Credana is a closed loop business management platform which allows the accreditation agencies, and internal and contracted assessors/ auditors to participate in a secure and single cloud-based solution. This is carried out throughout the lifecycle of the quality, compliance and certification processes. Ideally designed for multinational, multilingual and multi partner work environments, the cloud-based web solution, Xybion's CQRM XD Credana, allows interconnectivity with other systems and within its own workflows.

Configurable Logical Workflow Layouts to minimize Users' Data Entry Tasks

Key Features:

◆ **Closed Loop**

The product offers a closed-loop process to effectively manage Corrective And Preventive Actions (CAPA) and integrates with other processes deemed critical for regulatory compliance. This involves automation of prescribed actions such as document management, non-conformance management, compliance management, audits, deviations and investigations.

◆ **Transparent**

CQRM XD Credana 's automated approach helps businesses to have full control and real-time transparency over their critical activities, including monitoring of compliance procedures, end user companies documentation along with managing approvals, thus shortening the cycle of corrective actions.

◆ **Flexible, Scalable and Configurable**

The platform offers a building block approach that facilitates the creation of applications for the global accreditation industry. CQRM XD Credana is a highly configurable solution to help manage business processes, create new applications and customize the tools that suit your needs.

◆ **Manage and Track**

With CQRM XD CREDANA, it is now easy to manage all types of stakeholders, including customers, partners, external contractors and various governing bodies.

CQRM XD Credana Software

- Creates and controls business-centric forms
- Creates a list of values allowing interoperability between internal workflows and external systems.
- Can reuse the values in multiple places throughout the system – for ease of long-term maintenance
- Generates automated official and formal reports
- Manages and triggers workflows, tasks, events and changes, allowing collaborative work without system constraints
- Embeds digital content management system supporting all file types
- Allows Auditors and Assessors to work securely while visiting customers and other third-party organizations in offline workplace

Authentication

- Built-in customers' needs driven authentication capabilities
- LDAP, SAML and modern OAuth are easily set up on servers and root DN for various databases and mail settings

Key Benefits

- ◆ Seamless integration with the internal business processes and external stakeholders
- ◆ Manage the entire life cycle of accreditation and certification processes
- ◆ Retire disparate workflows
- ◆ Increase efficiency in planning and scheduling
- ◆ Consistent methodology for processing assessments
- ◆ Better efficiency as information is stored in same database, year-on-year
- ◆ Greater transparency in the current snapshot of the state of the accreditation program
- ◆ Processing and implementing any number of customized applications leveraging on scalable and extensible platform
- ◆ Increased accuracy by integration with extra systems and offline toolkit, thereby reduce need of redundant data types.
