- OSHA and state reporting
- Soft tissue injury management and medical care
- Absence management
- Evidence based medical bill review
- Enterprise content management
- Care and case management
- Network management and credentialing
- E-occupational health practice management

Evidence Based Medical Bill Review

Your process. Your Way.

Our Evidance XD Medical Billing software module is a comprehensive, unified medical billing solution that streamlines billing workflows, reduces errors, decreases costs, and automates your billing processes. Integrated with our proprietary Workers' Comp Cloud, Evidance XD Medical Billing is a robust, intuitive, easy-to-use, customizable billing platform that allows you to have your process, your way.

Our platform is more than an adjudication system. The configuration of our bill review system is a consultative process. We understand our clients have a broad range of claim philosophies and while state legislatures and regulators make rules, interpretation of those rules may differ. We incorporated an option driven system allowing for almost infinite custom configuration possibilities.

Benefits of Xybion's Medical Bill Review Platform

- 100% cloud-based and accessible via any device
- Embedded evidence based guidelines
- Easily integrates with third party vendors
- No software to download
- Immediately access and connect internal systems that drive medical bill review
- Completely configurable - updates take days, not months
- Multiple bill intake options—embedded document management decreases processing turn-around-times
- Real-time fee schedule and usual and customary value updates
- Real-time access to bills in all statuses
- Embedded reporting
- Fully compliant with latest data standards and regulatory guidelines
- Established interfaces with clearinghouses and preferred provider organizations

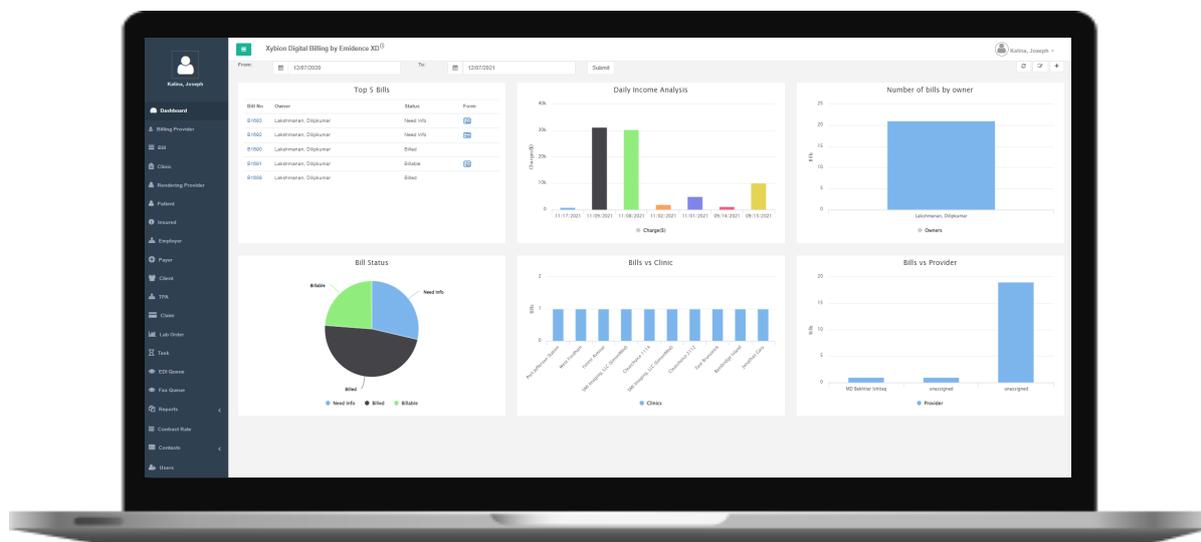

Comprehensive Medical Bill Review - Ensuring Data Integrity, Cost Containment and Lower Health Benefit Costs

Xybion's flexible, rules-based bill review engine combined with the power of our cloud platform will ensure best-in-class accuracy and turnaround time. The software platform is integrated in real-time with the latest fee schedules, state-specific rules, clinical best practice guidelines and EDI connectivity to provider networks.

The software delivers a high level of fee schedule automation to maximize your workers' compensation savings. Our intuitive and efficient user interface will allow your employees to be productive quickly.

Here are some of the core Bill Review features:

- Fee schedule values
- Out of network negotiation
- PPOs, MPNs and other specialty network connections
- Client specific business rules
- Standard and custom reporting, data analytics and business intelligence
- Accept bills in multiple formats (scanned, fax, mail, electronic, etc.)

Medical Bill Review - Additional Features:

Appropriateness of Care - The platform reviews whether a provider can invoice for the service billed. Example - A Registered Physical Therapist may not bill for a physician office visit.

Unbundling - Since the supply or service was already allowed under a previous billing, the platform checks for this and determines that the unbundled code should be denied.

Duplicate Billing - The platform will identify and deny payment for services or supplies that duplicate previous charges.

Utilization Review - A platform warning can alert both the provider and the adjuster to potential over treatment and will request objective documentation from the provider.

Level of Service - The service would be reviewed as 99214 or 99213. However, the platform will prompt the user that the service 99215 requires a diagnosis that carries a high level of medical decision-making and a high risk of death or permanent disability and is therefore inappropriate.

Multiple Bill Intake Methods:

Our interface provides multiple options and formats for billing that can save time and effort for the patients and the providers:

- EDI / FTP
- Scanned Bills / Fax
- Email / Mail
- Manual

The screenshot shows the 'Bill Intake' screen for bill ID B32. It includes fields for Bill Date (11/14/2017), Review Assignee (Mark Philip), KFI Assignee (Avanish), and Bill Status (Hold). The 'Diagnosis/CPT' tab is active. Patient information includes Name (Megia Darin), Address, and Insurance (MEDICARE). The 'Rendering Provider' is Jawad Bhatti. A 'Next' button is visible. On the right, a preview of a 'HEALTH INSURANCE CLAIM FORM' is shown, including a QR code and various form fields.

Diagnosis and CPT Entry:

It has all possible diagnosis options that can be readily chosen and auto-populated. Embedded rules allow customizable triggers. For instance, when diagnosis codes do not support the CPT codes or services rendered, manual entry can be done.

The screenshot shows the 'Diagnosis' entry screen for bill ID B32. It features a search bar and a list of diagnosis codes. A dropdown menu is open, showing options like '(C434) Malignant melanoma of scalp and neck' and '(17341) Basal cell carcinoma of scalp and skin of neck'. A table below shows the selected diagnosis and CPT code (95204) with a total amount of 1,500.00. A 'Next' button is visible. On the right, a preview of a 'HEALTH INSURANCE CLAIM FORM' is shown.

EDI Support:

Integration with PPO networks is another added feature that evaluates pre-existing relationships with multiple PPO providers to assist with additional savings. Bills that are uploaded to the core system, bridge directly to the network to include the contract rates applied and thereby save money for the patients.

Manage Interfaces

Interface Id	Interface Type	Name	Type	Version	Active
IF57	Inbound	Demo PPO 1	837P	1.0	<input checked="" type="checkbox"/>
IF50	Inbound	Medicare	837P	2	<input checked="" type="checkbox"/>
IF49	Inbound	Data from PPO	837P	1	<input checked="" type="checkbox"/>
IF48	Outbound	send to Availity	837P	1	<input checked="" type="checkbox"/>

Billing Dashboard: The billing review software platform includes a robust, real-time dashboard that displays KPI's and other key data sets that are role-based and integrate number of bills by client, daily savings, status of multiple bills, workload and assignee's information.

An Expert Partner Powering Your Service Experience through Technology

Workers' Comp Cloud within Evidance XD, is a cloud-based, low-code, rapidly configurable new generation digital platform that integrates process, quality and compliance management with data integrity; all within an integrated Enterprise Content Management system. All data is in a single database, facilitating a single source of truth, securely accessed in the cloud.

It is purpose-built to manage the employee care, risk, safety and compliance for employers, insurance companies and TPAs. ACOEM, ODG, OSHA, Digital ICD-10 billing and Digital Bill Review are all integrated for seamless workflow and process management. This mobile enabled platform allows you to have your own application, rapidly configure it to your business processes and have the comfort of knowing that you are working from the same data used by the previous work step and the work step that you will hand over to next.
