

Pristima XD Core is a fully integrated, end-to-end enterprise solution for tracking and managing veterinary facilities and research subjects throughout the preclinical research process.

For over 40 years, Global Pharma companies and CROs have relied on Xybion to drive data collection workflows while ensuring quality, efficiency, and compliance.

Need flexible deployment? Xybion offers on-premise or hosted solutions.

Are You SEND Ready?

Pristima XD Core's Savante module provides the most automated solution to produce SEND datasets.

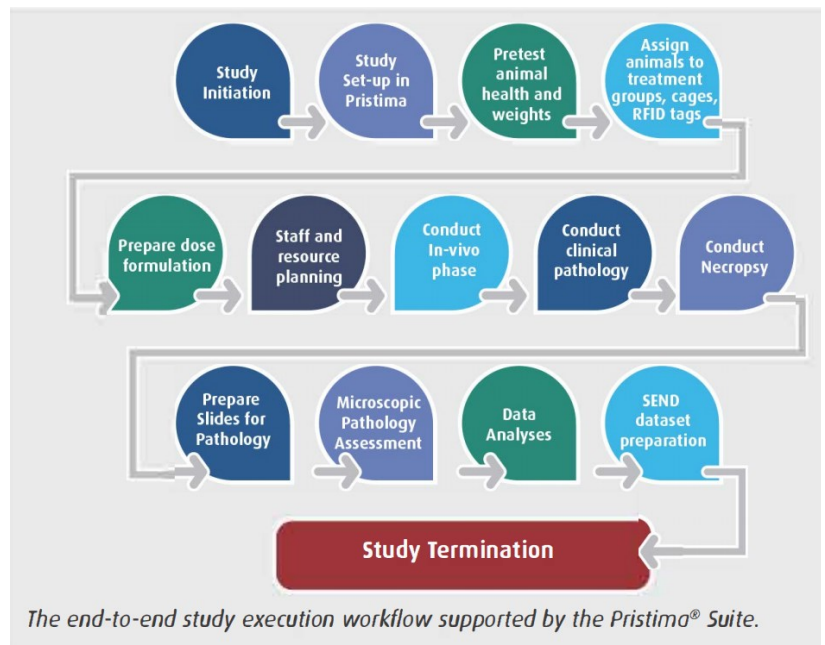

Pristima XD Core

Pristima XD Core is an advanced Preclinical Data Management platform that delivers full life cycle automation and support for Research and Safety, Study Management, Vivarium Management, and Veterinary Care. The platform offers comprehensive statistical reporting and analysis and is fully compliant with 21 CFR Part 11.

Key Benefits

- Pristima XD Core provides critical capabilities that allow you to streamline preclinical data collection and study management. Benefits include: Centralized Study Management. Tools to support research and safety study management, vivarium management and veterinary care allow you to drive efficiencies.
- Out-of-the-box Instrument Integration. Pristima supports data collection from over 100 clinical pathology instruments, allowing you to aggregate data from multiple sources.
- Streamlined Reporting and Submission. Pristima helps streamline reporting and submission processes through the delivery of real-time statistical analyses across multiple data sources.

- Integrated Quality and Compliance Management. Promote quality data management through configurable business rules, security and audit trails. Out-of-the-box integration with the Labwise platform offers additional features to support compliance and operational excellence.
- Modular and Flexible. Pristima® XD Core offers numerous modules, designed to allow you to leverage the functions you need.

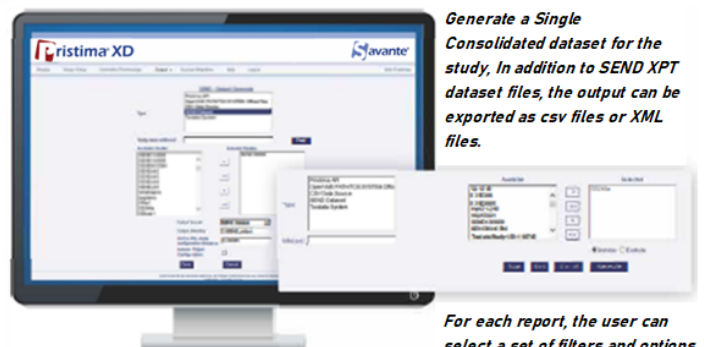

Core Modules

Xybion

Your Expert Partner

- Xybion has over 40 years of experience managing laboratory workflows and helping clients streamline compliance and mitigate risk.
- Xybion has extensive global experience and works with companies of all sizes from multiple industries.
- Xybion offers deep domain knowledge of FDA regulations and has a long track record of helping clients build effective risk mitigation strategies.

Generate a Single Consolidated dataset for the study. In addition to SEND XPT dataset files, the output can be exported as csv files or XML files.

For each report, the user can select a set of filters and options to create the desired output

About Xybion

Xybion is a leading SaaS company dedicated to providing life sciences and health systems companies with innovative software solutions to accelerate the transformation of today's inventions into tomorrow's approved medicines, devices, and diagnostic tests designed to save lives and keep employees safe. Our intelligent cloud platform and software solutions help companies accelerate digital transformation of processes, speed up innovation, optimize operations, reduce compliance risks, and achieve significant cost savings. Xybion is serving over 160 customers in 29 countries including all the top 20 global

biopharmaceutical companies. Xybion's global scale and expertise brings employees around the world to help companies in life sciences, health systems, research institutions, and governments. We put over 40 years of expertise in action every day to help companies digitally transform their regulated business operations. Our unique solutions focus on employee health and safety, integrated preclinical lab management, early-stage drug discovery, digital lab solutions, regulatory compliance, GRC, quality management, predictive compliance, content management, and systems validation.
