

Digital Acceleration Platform

Low Code, Cloud Based, Dynamic and Intelligence BPM

Xybion's Low-Code Digital Acceleration Platform, XDP is a purpose-built, cloud-based intelligent Business Process Management (iBPM) application designed for uses where high levels of regulations and strict evidence-based documentation of activities are required.

The low-code application platform (LCAP) incorporates adaptable BPM capabilities and out-of-the-box governance, complaints & incident management, predictive compliance, quality, health & safety, credentialing, and risk management.

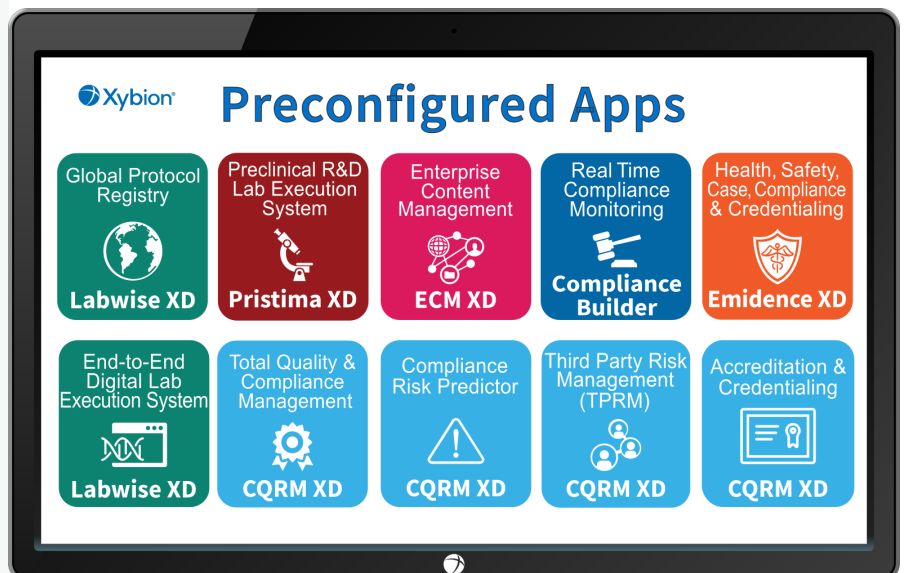

XDP creates a Digital Workplace Solution (DWS) incorporating Internet-of-Things where customers, suppliers/vendors, partners, governing bodies, and any other external/internal stakeholders in the company's value chain can collaborate in a secure, single cloud-based solution.

It is ideally designed for multinational, multilingual, and multi-partner work environments.

A true Digital Acceleration Platform must deliver the following:

- **Unified Operational Ecosystem & Integration Framework** to deliver data integrity across processes, quality and compliance domains.
- **A Rapid Configuration Engine** to personalize to your business.
- Create an **Intelligent Digital Workplace** for Mobile Workplace including all the modern technology tools and gadgets.

XDP's Functional Architecture brings all needed functionalities for dynamic business processes, governance, risk, quality, nonconformance, complaint, case management, content management, and integration capabilities on a single low-code technology-based COTS Platform offered as Platform as a Service (PaaS).

Low Code, Cloud Based, Dynamic and Intelligence BPM

Business Environments Evolve Rapidly. Now You Can Too.

Life Science organizations now have a powerful tool for propelling time-to-market, reacting quickly to evolving business requirements, and reducing operating costs. XDP allows organizations to retire disparate systems and experience the efficiency of a single collaborative workplace and content management system through dynamic workflow-software.

XDP allows organizations to retire disparate systems and experience the efficiency of a single collaborative workplace and content management system through dynamic workflow-software.

Build & Deploy Faster

Simplify Development

Reduce Cost

Continuous Improvement and Risk Management

Task management and trending capability allows organizations to identify operational issues, worker productivity and response time for issue mitigation.

Risk capabilities allow organizations to bring activities and strategic plans in alignment with risk appetite, including customer perception, regulatory compliance, competitive, and geopolitical factors.

XDP Platform Key Features Include:

- Code set Management
- Flexible task management and triggering of workflows, tasks, events and changes.
- Dynamic business process and workflow designer.
- Form Builder
- Rules Engine
- Query Builder
- Report mapping and report creation
- Integration framework and tools
- Export and import functionality
- Optimized for multinational, multilingual, and multi-partner work environments
- XDP APIs
- Support modules
- Appointment Management
- Multilingual
- User Management, roles and security
- Other integrations

About Xybion

Xybion is a leading SaaS company dedicated to providing life sciences and health systems companies with innovative software solutions to accelerate the transformation of today's inventions into tomorrow's approved medicines, devices, and diagnostic tests designed to save lives and keep employees safe. Our intelligent cloud platform and software solutions help companies accelerate digital transformation of processes, speed up innovation, optimize operations, reduce compliance risks, and achieve significant cost savings.

Xybion is serving over 160 customers in 29 countries including

all the top 20 global biopharmaceutical companies. Xybion's global scale and expertise brings employees around the world to help companies in life sciences, health systems, research institutions, and governments. We put over 40 years of expertise in action every day to help companies digitally transform their regulated business operations. Our unique solutions focus on employee health and safety, integrated preclinical lab management, early-stage drug discovery, digital lab solutions, regulatory compliance, GRC, quality management, predictive compliance, content management, and systems validation.
